

1975 Volkswagen Scirocco

1975 VOLKSWAGEN SCIROCCO

VW 3125-75

VW's new super coupe, the Scirocco, has a modified wedge profile, functional aerodynamic front and rear spoilers and a transversely mounted overhead cam engine that drives the front wheels.

In track tests the 2-plus-2 Scirocco (pronounced sher-rock'-oh) has a top speed of over 100 mph. Yet it is economical too, achieving 38 miles per gallon in Environmental Protection Agency highway ratings and 24 mpg in city tests.

The Scirocco -- named for a hot desert wind -- is equipped for Computer Analysis and is covered by the VW Owner's Security Blanket program, which includes a 12-month, 20,000-mile warranty. It is sold and serviced by some 1,200 VW dealers.
