

VW 3237-76

VW 3235-76

A larger, more powerful engine tops the list of improvements in the 1976 VW Scirocco hatchback coupe.

The engine size was increased from 1.5 to 1.6 liters to provide more go in the lower rev range. Also new are seats whose height and back rests are adjustable for a comfortable driving position.

Able to clock 11-second zero to 60 times, the Scirocco also delivers impressive mileage. In EPA tests it achieved 39 miles per gallon on the highway and 25 mpg in the city.

Sleek and practical, the Scirocco 2+2 is equipped with a socket for Computer Analysis, VW's exclusive service check system, and is covered by a limited 12-month, 20,000-mile warranty.
